- 2) Managed CloudN or CloudN as a Gateway (CaaG)
- 3) Associated CloudN licenses listed as S2C license.

Migration Option

Aviatrix has been making significant investment in the Secure Edge product area and will continue the development focus for Edge. The use cases for Edge cover deployment at customer on-premises locations and Equinix environments to take advantage of Aviatrix platform and network architecture for a cloud capable Edge. Please find information about Aviatrix Secure Edge, deployment options and capabilities here: [Aviatrix Secure Edge Connectivity :: Documentation](#)

We encourage customers to start planning migration to Edge from CloudN. Please work with Aviatrix account team and support to prepare and plan for migration to Edge.
